THE ———
 “Mechanical Engineer”
Pocket Calculator.

READ WHAT USERS SAY.

PROFESSOR JOHN GOODMAN, YORKSHIRE COLLEGE, Assoc.M.Inst.C.E.,
 M.I.Mech.E., says:—

“I like the Calculators very much. I consider them a marvel of cheapness, and I hope you will get a very big sale for them.”

WILFRED J. LINEHAM, M.Inst.C.E., M.I.Mech.E., HEAD OF THE
 ENGINEERING DEPARTMENT OF THE GOLDSMITHS' INSTITUTE, remarks:—

“The Mechanical Calculator is a decided boon to the draughtsman and the engineering teacher. A child could understand it, and I have no doubt you will have a tremendous sale.”

PROFESSOR W. W. F. PULLEN, Assoc.M.Inst.C.E., M.I.Mech.E., SOUTH
 WESTERN POLYTECHNIC, says:—

“I cannot speak too highly of the Pocket Calculator. Its great advantage over a slide rule is that it can be carried in the pocket without inconvenience. The figures are always clean, while the accuracy obtained with it is equal to that with a 10-inch slide rule. In my opinion it is the most useful instrument an engineer can possess.”

H. G. JORDAN, Wh.Sc., M.I.Mech.E., says:—

“The ‘Mechanical Engineer’ Pocket Calculator you supplied me with some few weeks ago I find to be very satisfactory. I must congratulate you on producing such a useful instrument at so reasonable a price.”

MR. H. A. CLARK, SOUTH WESTERN POLYTECHNIC, says:—

“The ‘Mechanical Engineer’ Pocket Calculator you supplied me with has proved very useful. It is an exceedingly compact, and at the same time, accurate instrument. It has been largely adopted by our students who are using it constantly.”

Messrs. BALL & CORBETT, CONSULTING AND CONTRACTING ENGINEERS,
 NEW YORK, say:—

“The Pocket Calculators you sent us some time since were received in good order, and we are very well pleased with them. Some friends of ours have asked us to send for some more of them, and you will please find enclosed a draft on London for . . . for which you will please send three more instruments.”
